

## Seminar Series Spring 2023

Recent Progress in Infection Biology

Mondays 17:15 – 18:15 CET  
Biozentrum U1.101

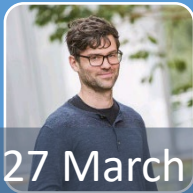

IN PERSON for Biozentrum students and staff  
HYBRID for external AntiResist members

13 March

### Prof. Dr. Hans Clevers

- Head of Pharma Research & Early Development (pRED), Roche
- “Organoids to model human infectious disease”
- Hosted by Prof. Christoph Dehio

27 March

### Prof. Hannes Link

- Eberhard Karls Universität Tübingen, Germany
- “A multi-omics approach to explore gene-drug interactions: how purine metabolism accelerates evolution of antibiotic resistance”
- Hosted by Prof. Dr. Mattia Zampieri

24 April

### Prof. Dr. med. Thomas M. Kessler

- Neuro-Urology at the University Clinic Balgrist, Zürich
- “Bacteriophages: Silver bullet against urinary tract infections?”
- Hosted by Prof. Christoph Dehio

8 May

### Prof. Sarah Fortune

- Harvard T.H. Chan School of Public Health, USA
- “It’s about time: identifying novel determinants of antibiotic responsiveness in *Mycobacterium tuberculosis*”
- Hosted by Prof. Dirk Bumann

12 June

### Prof. Charlotte Scott

- Ghent University, Belgium
- “Understanding hepatic macrophage plasticity at single cell resolution”
- Hosted by Prof. Dr. Urs Jenal
