Seminar Series  
Autumn Semester 2021

11 October 2021

**Prof. Andrew M. Edwards,**  
Imperial College London, UK

*Antibiotics of last resort: does mechanistic insight help identify opportunities to enhance efficacy?*

18 October 2021

**Prof. Núria Montserrat Pulido**  
Institute for Bioengineering of Catalonia,  
Barcelona, Spain

*Study on the interplay between glucose metabolism and SARS-COV-2 infection exploiting human organoids*

25 October 2021

**Prof. Man-Wah Tan**  
Genentec, San Francisco, USA

*Discovering and Developing Novel Antibiotics: Following Nature's Leads*

22 November 2021

**Prof. Sina Bartfeld**  
University of Würzburg, Germany

*Infection, innate immune signaling and cancer in the gut - human organoids as disease model*

06 December 2021

**Prof. Roi Avraham**  
Weizmann Institute of Science, Rehovot, Israel  
*Dynamic states of immune-bacteria encounters at early stages underlie infection outcome*
