EVENT

Promoting Innovative Antibiotic R&D in Switzerland

Thursday, June 24, 2021
from 9 to 16 h

Online Event
access information will be sent to
registered participants

Free registration [here](#)
or on www.nrp72.ch
until June 19, 2021

This event brings together protagonists of antibiotic Research and Development from academic, industrial, political and funding organizations active in Switzerland. It is organized by the National Research Programme “Antimicrobial Resistance” (NRP 72) and the National Centre of Competence in Research “AntiResist”.

The objective of the meeting is to discuss ways to facilitate technology transfer from academia to an industrial setting and to further the development of an attractive ecosystem, at national and international levels, in order to bring new antibiotics to the market.
